DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/2/2008 has been entered.

Specification

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: education information controller, education history storage and product sales information provider are not found in the specification.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-8, 10-18, and 21 are rejected under 35 U.S.C. 102(e) as being anticipated by Guheen et al. (US 6,519,571 B1).

Art Unit: 3714

Re claim 1, Guheen teaches the broadly claimed invention of an apparatus for providing, via a network (fig 89), information about a predetermined operation procedure of a product (Guheen teaches of allowing education to be tailored to individual needs), comprising: an education information controller (repositories) that controls the transmission of education information relating to the operation procedure of the product; an education history storage that stores a progress of education that is given by the education information (Fig 83, generating a curriculum of course offerings, allowing the selection of the course offerings, educating user over a network); and a product sales information provider that provides sales information regarding a product relating to the education (col 2, lines 5-25).

Re claim 2, education information controller determines the education according to a product category to which the product belongs (utilizing various types of user indicia such as search requests, products purchased, products looked at but not purchased and etc.)

Re claim 3, the education information controller transmits the education information that is common to all products in the product category (Guheen teaches of allowing the user to select the product category and education associated with it).

Re claim 4, the education information controller transmits the education information according to the history stored (history of products purchased, looked at but not purchased, products returned)

Art Unit: 3714

Re claim 5, education information controller transmits information to conduct a test to check how much the customer has understood the operation of the product, and the education history storage stores a result of the test as the history (customer education level, Assessment process seeks to determine a level of performance, or level of competency, because the goal of the overall education process is to enhance ability to perform).

Re claim 6, benefit offerer that offers the customer a benefit according to the result of the test (providing feedback to the user after the result of the test).

Re claim 7, the benefit offerer offers the benefit according to the history stored (same as claim 6 as previously indicated test result are stored).

Re claim 8, the benefit offerer offers the benefit in the form of at least one of a discount, a coupon and points (the result of the test will provide the examinee with a passing point, or grade).

Re claim 10, the product is application software and the product category is a computer is intended use by the applicant, Guheen teaches of providing IT staff with software and hardware for purchase.

Re claims 11-18, and 21, the limitations of claims 11-18 and 21 have been discussed above and will not be repeated herein.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gray et al. (US 6,994,596 B1) teaches of analyzing employees based on results of an education business simulation.

Examiner's Note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to KANG HU whose telephone number is (571)270-1344. The examiner can normally be reached on 8-5 (Mon-Thu).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pezzuto can be reached on 571-272-6996. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
